Framework:	Spring Boot, ASP.NET CORE, Symfony
Source control:	Github, Git
Database:	MySql, SQL Server, MongoDB

WORK EXPERIENCE

During my studies, I gained experience working with many different programming languages and frameworks, including PHP, Java, C#, Symfony, ASP.NET Core, and Spring Boot. Through academic projects and internships, I gained practical experience in developing and managing databases and building web applications. I have used Symfony and ASP.NET Core to implement various e-commerce web projects. Additionally, Java and Spring Boot have equipped me with enterprise application development skills, including the creation of store management apps and a document management website for schools using Spring Boot.

CAREER GOALS

Become a game programming engineer within the next 5 years. Within one year, I will complete my first game and graduate from college.
